Employment

Software Developer – Freelance

Full Stack (Work found in Portfolio/Github)

Montreal
2023-

- **Pouletto Restaurant**
 - Led the development of a full-stack web application for employee time tracking, utilizing technologies such as *Google Firestore, Firebase for Authentication, React, React-router-dom, CSS, and HTML*.
 - Application enhanced employee accountability and streamlined payroll/operations for the restaurant.
- **Nostos Restaurant**
 - Led the development of a comprehensive website and e-menu. Single-handedly establishing their online presence, modernizing business operations, and enhancing customer experience.
 - **Attracted** an average of 4,000-12,000 visits per month as of June 2023, significantly increasing business and reducing operation costs.
- **Elite Cleaning Service**
 - Led the design and launch of a professional website with an integrated contact form, effectively establishing the company's online presence and providing an efficient method for potential clients to reach out.
 - **Attracted** 100-300 visitors per month as of April 2023, playing a key role in the company's growth.

TELUS, SmartHome Security

Software Testing + Quality Assurance (Reference Available Upon Request)

Montreal
2021-2024

- Saved the company at least \$800,000 in technical dispatch costs through effective problem-solving and customer education.
- Led application testing and defect reporting, collaborating with diverse stakeholders, including clients and the software development department, to optimize workflows and refine testing processes.
- Utilized client feedback to contribute to the development of customer applications, enhancing user experience and process efficiency.

Software Projects

All my projects + info can be found on Github and/or my Portfolio.

- **Seela, an AI Article Summarizer**
 - Developed using *React, Tailwind, Redux and "Article Extractor and Summarizer" API from RapidAPI*.
 - The app allows users to paste a link to get a concise summary of the site/article demonstrating strong understanding of AI and its practical applications.
- **Sel's Vans, a Van-Renting Website Concept**
 - Developed using *React, React-Router-Dom and data retrieved from Google Firestore*.
 - A focus on user-experience, including a filtering system; demonstrated proficiency in using tools from react-router-dom, highlighting adaptability and continuous learning.
- **Selia's Library**
 - Developed a full stack MERN application using *MongoDB, React, React-Router-Dom, Tailwind, CORS, Node.js* and more.
 - Allows users to *GET, POST, PUT and DELETE* books, demonstrating proficiency in MERN stack.
 - Features a simple yet elegant design *with snackbar notifications and 2 data displaying choices: tables or cards*.
